

## Ciaran Bromhead

B.Sc ENV  
Environmental Scientist

# SEEC

Strategic Environmental and Engineering Consulting

Ciaran is a qualified environmental scientist. He has developed interest and expertise in on-site wastewater management, soil assessments and GIS mapping. Ciaran is currently completing a Master of Science – Earth and Environmental Studies at the University of Wollongong.

Ciaran has worked on a wide range of residential and commercial projects. His work includes on-site wastewater site and soil assessments, hydraulic design for on-site wastewater disposal and soil assessments. Ciaran has also worked along-side other SEEC team members in the completion of erosion and sediment control plans.

Ciaran is an Environmental Scientist and an integral part of the SEEC team. He blends expertise in on-site wastewater management with an interest in Geographical Information Systems (GIS).

### Qualifications

- Bachelor of Science (Environment). University of Wollongong, 2015
- Currently completing a Master's of Science (Earth and Environmental) University of Wollongong

### Areas of Expertise

- On-Site Wastewater Management Systems (Domestic and Commercial)
- On-Site Wastewater Hydraulic Designs
- Geotechnical Studies and Soil Assessments (Site Classifications, Salinity and Acid Sulphate Assessments)
- General field work for each of the above
- Data acquisition/GIS mapping

### Short Courses/Workshops Completed

- On-Site Wastewater Management (Three day workshop); Centre of Environmental Training, 2018.
- Erosion and Sediment Control (Four day workshop); Centre of Environmental Training, 2019)
- Work Safely in the Construction Industry, Express Online Training, 2018.

## Career Highlights

Environmental Scientist, SEEC; September 2018 to present.

- Residential and commercial on-site wastewater assessments
- On-site wastewater subdivision assessments
- Hydraulic design for wastewater disposal
- Soil assessments
- Report writing and erosion and sediment control plan drafting

## Recent Projects

- Wastewater Site and Soil Assessments and Detailed Designs of numerous residential and commercial developments: Southern Highlands, Southern Tablelands, South Coast and Greater Sydney Region.
- Site Classifications for numerous residential developments.
- Drafting erosion and sediment control plans for South Batemans Bay Link Road upgrade.
- Drafting erosion and sediment control plans for Coffs Harbour Bypass.
- Project management of Vital Chemical Pty Ltd Seed germination trials ACT
